DOCUMENT RESUME

ED 355 462 CG 024 822

AUTHOR Tillman, Peggie S.
TITLE Adolescent Alcoholism. January 1986 through April 1992. Current Bibliographies in Medicine.
INSTITUTION National Library of Medicine (DHHS/NIH), Bethesda, Md.
REPORT NO CBM-92-3
PUB DATE 92
NOTE 47p.
AVAILABLE FROM Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (CBM-92-3, $3.25, $4.06 foreign).
PUB TYPE Reference Materials - Bibliographies (131)

EDRS PRICE MF01/PC02 Plus Postage.
DESCRIPTORS *Adolescents; *Alcoholism; Genetics; Health Services; Prevention; Psychological Characteristics; Rehabilitation; Social Influences; Statistics

ABSTRACT

A variety of databases were searched for the compilation of this bibliography on adolescent alcoholism, reflecting the psychological and socioeconomic aspects covered. Nine hundred and twenty-eight citations in English and foreign languages for the period January 1986 through April 1992 were included. For journal articles written in a foreign language, the English translation of the title is placed in brackets; for monographs, the title is given in the original language. In both cases the language of publication is shown by a three letter abbreviation appearing at the end of the citation. Arrangement is by eight subject headings; a citation appears in only one. The citations are formatted according to the rules established for Index Medicus. The eight subject headings include: (1) prevention and control; (2) genetics; (3) psychology; (4) social factors; (5) health services; (6) rehabilitation; (7) complications; and (8) statistics. SERIES NOTE

Current Bibliographies in Medicine (CBM) is a continuation in part of the National Library of Medicine's Literature Search Series, which ceased in 1987 with No. 87-15. In 1989 it also subsumed the *Specialized Bibliography Series*. Each bibliography in the new series covers a distinct subject area of biomedicine and is intended to fulfill a current awareness function. Citations are usually derived from searching a variety of online databases. NLM databases utilized include MEDLINE®, AVLINE®, BIOETHICSLINE®, CANCERLIT®, CATLINE®, HEALTH, POPLINE™ and TOXLINE®. The only criterion for the inclusion of a particular published work is its relevance to the topic being presented; the format, ownership, or location of the material is not considered.

Comments and suggestions on this series may be addressed to:

Ordering Information:

Current Bibliographies in Medicine is sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. To order the entire CBM series for the calendar year 1992 (approx. 14 bibliographies), send $41.00 ($51.25 foreign) to the Superintendent of Documents citing GPO List ID: CBM92. For your convenience an order blank is given inside the back cover. Orders for individual bibliographies in the series ($3.25, $4.06 foreign) should be sent to the Superintendent of Documents citing the title, CBM number, and the GPO List ID given above.

Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through September 30, 1992.

ADOLESCENT ALCOHOLISM

Alcoholism, a primary health problem in the nation, is recognized by the American Medical Association as a disease which can be arrested but not cured. Of particular concern at present is the widespread, increased consumption of alcohol by children and adolescents. In addition to the risk of developmental delays due to interference with normal maturation, early use or abuse of alcohol may result in long-term adverse social, emotional, and economic effects.

The drug of choice of most substance-abusing adolescents is alcohol. Before the end of the adolescent years, it is hypothesized that a majority of young people will have experiences with alcohol and/or other drugs. An estimated one half of youths have used alcohol by the age of thirteen; approximately one third drink on a monthly basis by the end of high school. Statistics indicate that alcohol was involved in half of the teenage traffic fatalities in 1990. Other social problems, e.g., teenage suicide, adolescent pregnancy, delinquency, and poor school performance, may be closely related to alcohol use. The minimum drinking age has been raised to twenty-one in most states as one method of counteracting this marked increase in alcohol use among adolescents.

A variety of databases were searched for the compilation of this bibliography, reflecting the psychological and socioeconomic aspects covered. Citations in English and foreign languages for the period January 1986 through April 1992 were included. Arrangement is by eight subject categories; a citation appears in only one.

SEARCH STRATEGY

A variety of online databases are usually searched in preparing bibliographies in the CBM series. To assist you in updating or otherwise manipulating the material in this search, the strategy used for the NLM's MEDLINE database is given below. Please note that the search strategies presented here differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.

SS 1 = EXP C21.613.53.270 OR ALCOHOL INTOXICATION OR
EXP ALCOHOLIC BEVERAGES OR ALCOHOL DRINKING OR
ALCOHOLICS ANONYMOUS OR ADAMHA

SS 2 = 1 OR ANON (TW) OR ALATEEN (TW)

SS 3 = 2 AND ADOLESCENCE OR 2 AND CHILD

SS 4 = 3 AND BEHAVIOR A#D BEHAVIOR MECHANISMS (PX)

SS 5 = 3 AND PSYCHOLOGIC PROCESSES PRINCIPLES (PX)

SS 6 = 3 AND BEHAVIORAL A#D MENTAL DISORDERS (PX)

SS 7 = 4 OR 5 OR 6

GRATEFUL MED®

To make online searching easier and more efficient, the Library offers GRATEFUL MED, microcomputer-based software that provides a user-friendly interface to most NLM databases. This software was specifically developed for health professionals and features multiple choice menus and "fill in the blank" screens for easy search preparation. GRATEFUL MED runs on an IBM PC (or IBM-compatible) with DOS 2.0 or a Macintosh, and requires a Hayes (or Hayes-compatible) modem. It may be purchased from the National Technical Information Service in Springfield, Virginia, for $29.95 (plus $3.00 per order for shipping). For your convenience, an order blank has been enclosed at the back of this bibliography.

SAMPLE CITATIONS

Citations in this bibliographic series are formatted according to the rules established for *Index Medicus**. Sample journal and monograph citations appear below. For journal articles written in a foreign language, the English translation of the title is placed in brackets; for monographs, the title is given in the original language. In both cases the language of publication is shown by a three letter abbreviation appearing at the end of the citation. Note also that a colon (:) may appear within an author's name or article title. The NLM computer system automatically inserts this symbol in the place of a diacritical mark.

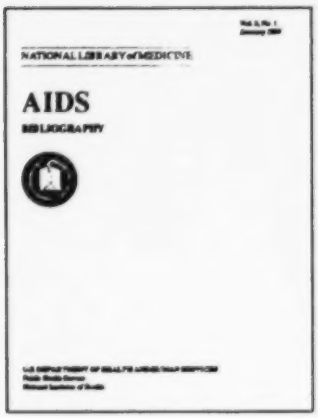
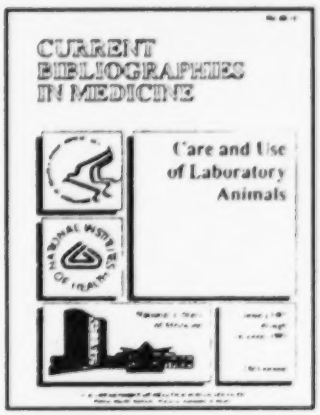
*In addition to your order you will receive **free** yearly upgrades of the software and information on obtaining a user code required to access the National Library of Medicine's datafiles.*

National Library of Medicine
Reference Bibliography Series





☐ ***AIDS Bibliography*** *
$77 ($99.25 foreign) per year. A monthly publication. Individual issues $7.50 ($9.38 foreign)
GPO List ID: **AID92**

Bibliographic listing of references to current articles on Acquired Immunodeficiency Syndrome (AIDS). Each issue consists of about 700-900 recent references to journal articles, books, and audiovisuals on AIDS.

☐ ***Current Bibliographies in Medicine*** *
$41 ($51.25 foreign) per year.
Individual issues $3.25 ($4.06 foreign) per copy.
GPO List ID: **CBM92**

Approximately 15 bibliographies per year are produced on a variety of biomedical topics, excluding AIDS. Topics are chosen for their current popular interest in distinct subject areas of biomedicine.

*Subscribers receive all issues for a given calendar year without regard to the date of order.
